SOFTWARE ENGINEER

I am a senior Software Engineering student with a strong interest in mobile, web and full-stack technologies.

PROFESSIONAL EXPERIENCE

Jotform

DevOps Engineer / Intern

June 2025 - August 2025

Ankara, Türkiye

Assisting in automating deployment pipelines, monitoring systems, and optimizing cloud infrastructure.

Outlier

Artificial Intelligence Trainer / Prompt Engineer

Freelance

San Francisco, USA

Developed prompts for AI to generate code in various programming languages, including Java, Python, Verilog and C++. Validated AI-generated outputs and ensured accuracy and functionality. Corrected errors and improved AI responses based on thorough validation.

Robot El Derneği

Data Reporting Analyst / Intern

Aug 2024 - June 2025

İstanbul, Türkiye

Collecting, analyzing, and reporting project data; analyzing feedback and preparing improvement suggestions; tracking project progress by preparing regular reports; determining how project data should be stored at Robotel Association and researching alternative learning methods for statistics that are not kept in Turkey.

Saat Teknoloji

Back-end Developer / Intern

Jul 2024 - Aug 2024

Kastamonu, Türkiye

Working on the backend development of a live streaming and program viewing platform for films, series, and TV channels, utilizing EPG correction technology. Implementing a keyword-based search function on the platform by integrating Elasticsearch with Java Spring Boot.

PROJECTS

Academic Vocabulary Search Engine | PHP, HTML, CSS, JavaScript

Active website

Designed, developed, and deployed the website independently, covering all stages from UI/UX design to coding and distribution. Mobile-friendly, fully client-side academic synonym search engine, focusing on formal synonyms used in academic contexts.

-Supervised by Dr. Aykut Yıldız, Department of Electrical and Electronics Engineering, TED University.

Elasticsearch Word-Based Search Backend | Java, Spring Boot, Elasticsearch

Source codes

Designed a backend using Elasticsearch to enable word-based searches in video subtitles, providing precise time intervals for spoken words. Ideal for platforms with subtitle-integrated content like films and live events.

-During my internship at Saat Teknoloji Company.

Cargo Delivery Simulation Program | Java

Source codes

Simulated cargo delivery operations for a shipping company using custom Java implementations of doubly linked lists, stacks, and queues. The program modeled resource management and mission execution between distribution centers.

*-For "Data Structures and Algorithms" course. Final grade of **100%***

Online Reservation System for Restaurants | Java

Source codes

An online reservation system for restaurants using Java and JavaScript.

*-For "Database Systems" course. Final grade of **93%***

-Led a team of 4: organized meetings and delegated tasks.

-Implementing CRUD operations through SQL.

Hospital Database Manager | Java

Source codes

Implemented a hospital database system using binary search trees (BST) for efficient data organization and retrieval, fully developed in Java without external libraries.

*-For "Data Structures and Algorithms" course. Final grade of **80%***

Sorting Algorithm Detective: Execution Analysis | Java

Source codes

Conducted runtime analysis of five sorting algorithms from a provided library, identifying each algorithm based on time complexity and experimental data, with results documented in a detailed report.

*-For "Data Structures and Algorithms" course. Final grade of **100%***

Sorting Algorithm Mastery: Step-by-Step Implementation | Java

Source codes

Developed sorting algorithms from scratch to deepen algorithmic understanding without external libraries, emphasizing step-by-step implementation and hands-on practice.

*-For "Data Structures and Algorithms" course. Final grade of **95%***

SKILLS

Programming | Java, Javascript, Python, Spring Boot, C, C++

Web&Database | HTML, CSS, MySQL, PostgreSQL, Docker

Tech | Git, VSCode, Eclipse, IntelliJ, MS Office programs

Language | Turkish (native), English (high advanced), German (advanced)

EDUCATION

TED University 2022-Present

Software Engineering

Ankara, Türkiye

Expected graduation GPA: 3.11/4.00

Göl Anadolu High School 2019-2021

Kastamonu, Türkiye

GPA: 92/100

Seven Lakes High School 2018-2019

Houston/Texas, USA

Freshman Year

EXTRACURRICULAR ACTIVITIES

Web Team Member

Google Developers Group TEDU

Public Relations Team Member

Google Developers Group TEDU

Project and Competition Team Member

TEDU AI & Data Science

Vice President

Interact Club Kastamonu

Volunteer Supplier

2017 Texas Hurricane Harvey
